2.0 Internet of Things

Start Your IoT Journey Here

Invest in learning IoT (Internet of Things) skills and you can transform any business in any industry, from manufacturing to saving endangered species. Imagine 26 billion people, systems, and physical objects connecting and sharing data seamlessly over the internet. This is not a what-if scenario, its real-life, and it is coming together all around us right now. Learn how IoT is changing the world and the IoT skills you will need to land a well-paying job. No prerequisites are required.

You will Learn These Core Skills:

- Learn how the current digital transformation is creating unprecedented economic opportunities.
- Understand how the IoT is bridging the gap between operational and information technology systems.
- Discover how standard business processes are being transformed.
- The security concerns that must be considered when implementing IoT solutions.

Take your first step now! Click the link below start with Internet of Things

3.0 Introduction to Cybersecurity

With billions of devices connected online, new threats pop-up every second

Today's interconnected world makes everyone more susceptible to cyber-attacks. Whether you are attracted to the relatively new world of cybersecurity as a professional, or just interested in protecting yourself online and in social media, this introductory course is the answer. It explores cyber trends, threats—along with the broader topic of cybersecurity in a way that will matter to YOU. For instance, you will learn how to protect your personal privacy online while gaining additional insight into the challenges companies, and governmental and educational institutions face today. You will also earn a Networking Academy badge for completing this course. No prerequisites are required. Click the link below to start

Introduction to Cybersecurity.

4.0 Linux Unhatched

The “start from scratch” Linux course

Have you ever considered a career in Linux? Or, stuck in a dead-end job and exploring options for a career change? NDG Linux Unhatched allows students to wade into the shallow end of Linux, the back-end operating system used by global titans such as Facebook, Google, Microsoft, NASA, Tesla, Amazon, and more. Graduates walk away with a clear understanding of whether Linux is for them or not, without having to commit to more than 8 total hours of self-paced learning. To ensure you are not stuck, you will be guided step-by-step through a series of hands-on virtual machine activities. The course aligns well with the Linux exam objectives found on the CompTIA A+ Certification. Take your first step now! Click the link

below to start with Linux Unhatched.
